Subject: Justice for Microsoft

Your Honor,

Microsoft is a company that consistently innovates and creates superb new products. There is a reason that they have millions of satisfied customers around the world: they provide outstanding and affordable products.

Justice requires that a company so creative and proficient be honored, not criticized or attacked. Please do justice to an enormously productive company.

At your leisure, please re-read Ayn Rand's seminal novel, *Atlas Shrugged*, for the moral and philosophical principles underlying the necessity of doing justice to the producers.

Respectfully,

Andrew Bernstein, Ph.D.

Dept. of Philosophy

Pace University
